

Joshuva A

Cybersecurity Analyst

+91 9894333110 | joshuva3333@gmail.com | 98,5th Annai Theresa Street, Puzhuthivakkam, Chennai- 91

Summary

Cybersecurity professional with 4+ years of experience driving enterprise security transformation, risk quantification, and governance across a mid-sized global organization (~1800 endpoints). Proven track record in leading cross-functional security initiatives, optimizing security investments, and aligning cybersecurity strategy with business risk. Experienced in Cyber Risk Quantification (FAIR-CAM), AI security governance, and large-scale implementations across identity, endpoint, and cloud environments. Known for fast decision-making, ownership, and delivering measurable impact in high-pressure scenarios.

Core Competencies

- Cyber Risk Quantification (CRQM) & FAIR-CAM
- Security Governance & Compliance (ISO 27001, PCI-DSS, HIPAA, GDPR)
- Incident Response & Threat Management
- Identity & Access Management (IAM, SSO, MFA)
- Endpoint Security & EDR Strategy
- Cloud Security Posture Management (CSPM)
- Security Architecture & Tool Rationalization
- Vendor Risk Management & Cost Optimization
- AI Security Governance (ISO 42001 - in progress)

Credentials

CompTia Security+ Cybersecurity Professional Certificate [April/2026]

CISSP - In Progress

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst,

LatentView Analytics Ltd | Chennai | May 2024 - Present

- Led enterprise-wide security operations and governance across 15+ cybersecurity domains, supporting a global environment of ~1800 endpoints
- Spearheaded full-scale deployment of CrowdStrike Falcon, replacing legacy McAfee stack and achieving unified endpoint protection, detection, and vulnerability management
- Designed and implemented Cyber Risk Quantification (CRQM) using SAFE Security aligned with FAIR-CAM methodology, integrating 60+ security controls and API-based telemetry to model financial risk scenarios
- Enabled \$5M-\$10M cost optimization through strategic tool consolidation, cyber insurance alignment, and risk-informed investment decisions
- Led identity transformation by replacing on-prem Active Directory with JumpCloud, enabling centralized IAM, MFA enforcement, and SAML/OAuth-based SSO across Windows, macOS, and Linux environments
- Acted as primary incident lead during global endpoint disruption (CrowdStrike outage - July 2024), coordinating rapid recovery of 500+ affected systems within 24 hours, ensuring minimal business impact
- Directed Red Team engagements with global vendors, identifying control gaps and driving remediation across identity, network, and endpoint layers
- Developed and executed Incident Response (IR) strategies, business continuity planning, and tabletop exercises involving executive leadership
- Governed enterprise compliance initiatives including ISO 27001 and PCI-DSS audits, supporting internal and external audit readiness
- Designed and executed quarterly phishing simulations, awareness campaigns, and policy rollouts to improve organizational security posture
- Currently contributing to AI Security Governance Framework aligned with ISO 42001, focusing on secure AI adoption and risk management

POC Executive

LatentViewAnalytics Ltd | Chennai | Mar 2022 - May 2024

- Conducted 50+ technology evaluations and Proof-of-Concepts (POCs) across security, collaboration, and infrastructure domains, driving informed decision-making for enterprise tool adoption
- Delivered cost-effective encryption strategy by implementing BitLocker (Windows) and FileVault (macOS), eliminating legacy McAfee dependency and reducing licensing overhead
- Led endpoint security transformation initiative by evaluating and enabling transition to modern EDR solutions, improving detection and response capabilities
- Evaluated and implemented enterprise knowledge management platforms including Atlassian Confluence, improving collaboration and centralized documentation
- Managed vendor lifecycle including technical evaluation, pricing negotiation, contract review (NDA, SLA), and stakeholder alignment
- Collaborated with cross-functional teams (CISO, IT, Finance) to align technology decisions with business and security objectives

Education

Bachelor Engineering - Computer Science, Anna University

CGPA: 7.4

Awards & Achievements

- Core contributor to **DSCI 2025 Award-Winning Best Cybersecurity Team (India)**, recognized for scalable security and compliance leadership.
- **CompTIA Security+ certified** on April 2026 - Pursuing CSSP Certification
- Enablement Function - Encore Award winner in 2023
- Have attended **300+ Webinars** and product Launches with security trends and strategies to be on track.
- Toastmaster Level 1 Completion
